

VIDFOKAL

*Calcium & Phosphorus supplement
enriched with galactagogue herb & micronutrients*

Calcium & Phosphorus are two very important nutritional factors associated with production in dairy cows especially for milk production in lactating animal and growth in young calves. However, their functions sometime gets limited due to absence or shortage of other micro-nutrients which are part of physiological processes essential for milk synthesis, processes, let down as well as recovery of animal from production stress.

VIDFOKAL has been designed considering all the critical needs during lactation, high milk production and its sustenance over a long period of time.

VIDFOKAL

VIDFOKAL Has:

Each 100 ml contains:

Calcium (3250 mg)

Phosphorous (1625 mg)

Vitamin D3 (16000 IU)

Vitamin B12 (200 mcg)

Carbohydrate (280 mg)

Colour (Erythrosine)

Enriched with cu, mn and zinc micro-nutrients

Features & Benefits:

- VIDFOKAL has Ca & P in the right ratio(2:1) so as to have right balance between two elements which is very essential.
- VIDFOKAL has Vitamin D₃ which promotes intestinal absorption of calcium and phosphorous thus extra calcium gets available to the system.
- VIDFOKAL is Enriched with Vitamin B₁₂ is essential for cell growth, maturation and energy production. It also enhances the immunity of animal.
- VIDFOKAL is enriched with Chelate Minerals Zn and Mn ensures correct metabolism and milk synthesis. Zn is virtually involved in every step of cell growth. The mineral chelates gets absorbed better than inorganic minerals and lower concentrations can be used in animal feeds which is helpful in the milk yield and the milk fat percentage.
- Natural galactogogue added in VIDFOKAL ensures proper functioning of milk apparatus itself leading to higher milk production.
- Overall VIDFOKAL ensures better growth, production, immunity of young and adult animals. It ensures proper development of skeletal system in young one, if given as continuous supplementation and prevents problems encountered on account of Ca & P deficiencies in animals.

Usage:

- Cows, buffalo and horse: 50 ml twice daily.
- Calf, sheep, goat dose: 20 ml twice daily.
- Poultry: 10- 20 ml /100 birds / day.

VIDFOKAL can be administered as a drench or as mixed with feed or water.

Presentation:

- 1 ltr. & 5 ltr. HDPE jar

Other Important Notes

- **Precaution:** None Specific precaution.
- **Side Effect:** None Recorded
- **Storage:** Keep in a Dark Place.
- **Toxicity:** None recorded
- **Withdrawal Period:** Nil
- **Shelf Life:** 18 Months
